

ATOMIZER

Complete Atomizer Assembly

Patent #: 6,551,402
Patent #: 6,783,082

Atomizer head

The atomizer is a patented design (Patent # 6,551,402 & 6,783,082) by USC to help distribute product more evenly over seed before going through a tumbling drum. Product is fed through a stainless steel line and dropped into the center of the atomizer. The atomizer spins at 1725 rpm, forcing product through a screen and onto the seed as it passes through the atomizer chamber.

<u>Description</u>	<u>Part #</u>
Atomizer Head	04-02-0003
Atomizer Head, Cotton	04-02-0004
Atomizer for LP800 w/out motor	04-01-0005
Atomizer for LP800, Cotton/Rice w/out motor	04-01-0006
Atomizer for LP2000 w/out motor	04-01-0009
Atomizer for LP2000, Cotton/Rice w/out motor	04-01-0010
Atomizer motor .33HP 1725RPM 1Phase	01-01-0104
Atomizer motor .33HP 1725RPM 3Phase	01-01-0105
